ANDREI JOHN S. SAGER

Software Developer

Philippines • +63 (920) 269-0539 • andreisager@proton.me

Summary

I am a Software Developer and Computer Science graduate who builds responsive, user-friendly, and API-driven applications. I am looking to utilize my proficiency in React, Node.js, and JavaScript to build scalable features and improve performance while contributing to the long-term goals of the company's engineering team.

Skills

Frontend

- HTML
- JavaScript (ES6+)
- TypeScript
- CSS
- TailwindCSS

Backend

- Node.js
- Redux
- Jest
- PostgreSQL

Source Control

- Git
- GitHub
- GitHub Desktop

Frameworks

- ReactJS
- NextJS

Tooling

- Figma
- Postman
- ESList/Prettier
- Lighthouse SEO

Experience

Sobowale Studios — Makati

Short-form Video Editor — Aug 2025 – present

- Organized and managed video assets using scalable directory schemas, structured file systems, asset tracking, and cloud collaboration, reducing project setup and media search time by 53% while streamlining team workflows.
- Optimized product interfaces by applying frame-accurate precision, pixel-perfect implementation, and narrative-driven storytelling, resulting in a 14% boost in user retention.
- Influenced Agile workflows through technical communication, cross-functional collaboration, and rapid interactive development to ensure 100% on-time time-critical deliveries and a 17% boost in sprint efficiency.

Accenture — Mandaluyong

React Developer • Internship — Jan 2025 – May 2025

- Built a scalable full-stack application using Node.js and Express.js, implementing MVC (Model-View-Controller) architecture to separate business logic from data presentation.
- Engineered and integrated a relational database schema in PostgreSQL, utilizing indexing and query optimization to reduce data retrieval latency by 25% for high-traffic endpoints with Embedded JavaScript (EJS).

Ace Medical Center — Mandaluyong

React Native Developer • Blood Bank App • Thesis — Nov 2023 – Dec 2024

- Engineered a library of 25+ high-performance and reusable React Native components including wrappers, accelerating the development cycle by 66% while ensuring UI/UX consistency.
- Built an automated report generation engine using Firebase Cloud Functions and Batch Increments, enabling real-time inventory tracking and improving supply chain transparency for hospital administrators.
- Designed a seamless data layer using Redux Toolkit for centralized state management and Firebase/Firestore for real-time CRUD operations. Optimized API calls to maintain low latency during peak laboratory hours.

Education

STI College Sta. Mesa — Manila, Metro Manila

Bachelor Of Computer Science, Cum Laude, Best In Thesis — July 2025
